Join BQWCHC and you may be eligible for a \$25,000 nursing grant through the Community Commitment Program. For greater details visit [Community Commitment Program for Nurses](#)

Key Areas of Responsibility:

- Perform assessments, triage, health education/counseling, history taking, and other clinical activities in accordance with the College of Nurses of Ontario standards of nursing practice and evidence-informed best practice guidelines
- Provide high-quality client care independently through the use of medical directives and collaboratively as part of an interdisciplinary team
- Collaborate with Nurse Practitioner and Physician group in the development, revision and implementation of evidence-informed medical directives
- Deliver care in a trauma-informed manner that respects client self-determination and reflects an understanding of the social determinants of health
- Provide back-up coverage in the general clinic nursing role, as required
- Participate in the development, implementation, monitoring and evaluation of treatment, education, counseling and health promotion programs and services with a focus on individuals living with chronic conditions, caring for someone with a chronic condition, or at risk of developing one
- Ensure program design and delivery is aligned with BQWCHC priorities and values including client engagement, accessibility for target populations and responsiveness to the social determinants of health

Qualifications:

- Registration in good standing with the CNO as a Registered Nurse (RN) or Registered Practical Nurse (RPN)
- RN must have a minimum of three years of experience practicing in chronic disease management; current certification as a Certified Diabetes Educator (CDE) is considered an asset
- RPN must hold current certification as a CDE
- Nursing experience in a community setting or combination of community, hospital or public health settings; experience in a primary care setting is considered an asset.
- Experience working in team-based care environment.
- Clinical leadership experience in chronic disease management is considered an asset.
- Experience in program planning, implementation, delivery and evaluation is considered an asset.
